Domain & Leadership: Insurance Analytics, International Business Reporting, Business Performance Analytics, Module/Project Leadership, Stakeholder Management, Cross-Functional Collaboration, Data-Driven Decision Support

TECHNICAL SKILLS

BI & Visualization: QlikView, Qlik Sense, Qlik NPrinting, Power BI

Analytics: Data Analysis, KPI Analytics, Business Analytics, Performance Analytics, Advanced Analytics

Programming & Data: Python, SQL, Shell / Bash; SAP, Oracle, SQL Server, Teradata, Siebel, MS Access, Hadoop, Flat Files

Data Science & Cloud: Databricks; Advanced Analytics and ML/AI project coordination

Project & Delivery: Requirements Management, Delivery Governance, Stakeholder Management, UAT & Production Support [Add Jira / Confluence / Agile if applicable]

CERTIFICATIONS

- Databricks Certified Data Analyst Associate
- Databricks Certified Data Engineer Associate; Databricks Certified Generative AI Engineer Associate
- Microsoft Power BI Data Analyst Associate (PL-300)
- Qlik Sense Business Analyst (QSBA); Qlik Sense Data Architect (QSDA 2024); QlikView 12 Business Analyst (QVBA); QlikView 12 Data Architect (QV12DA)

PROFESSIONAL EXPERIENCE

Senior Analytics & BI Consultant — International Module Lead

Jul 2022 – Present

LTIMindtree

Client: Travelers (Property & Casualty Insurance, USA)

- **Lead the International module** of the Travelers insurance engagement, owning analytics and BI deliverables across [X] international regions/markets and coordinating end-to-end delivery from requirements through deployment and support.
- **Translate complex insurance and international business requirements** into analytical, reporting, and dashboarding solutions in partnership with business stakeholders and leadership.
- **Manage priorities, dependencies, timelines, risks, and deliverables** for the module, coordinating cross-functional teams of business analysts, data engineers, BI developers, and data scientists ([X]-member team).
- **Delivered Distributor Performance Management KPIs** including Written and Earned Premiums, improving reporting accuracy by 25% and strengthening data-driven decision-making for international operations.

- **Drove automation initiatives** that improved process efficiency by 30% and reduced manual reporting effort by [X%].
- **Collaborated with audit and compliance teams** to reduce audit findings by 15% through validated, governance-aligned insights and data quality controls.
- **Review analytical and reporting deliverables** for quality and business alignment, and communicate status, risks, dependencies, and outcomes to business and technical stakeholders.
- **Support Data Science and Advanced Analytics use cases** by identifying analytics opportunities, coordinating between business and data science teams, and transitioning model outputs into business-facing dashboards and decision-support solutions.

Analytics & BI Consultant

Aug 2020 – Jul 2022

Fractal Analytics

- **Delivered retail analytics dashboards** that improved sales-tracking accuracy by 20% and enabled data-driven category and performance decisions.
- **Partnered with data engineering teams** to ensure clean, consistent, and validated data across domains for reliable analytics.
- **Applied advanced analytics (Apriori algorithm)** to analyze BOM hierarchies, reducing inventory costs by 15% and improving supply-chain accuracy by 20%.
- **Mentored junior analysts** and standardized reporting frameworks to improve consistency, reusability, and scalability.

Senior BI Consultant

Jun 2017 – Mar 2020

Icon Business Solutions

India

- **Led and mentored a BI team of 10+ members** improving delivery efficiency by 25% across multiple client engagements.
- **Designed and delivered KPI dashboards** that enhanced data accessibility by 30% using diverse data sources across Banking, Retail, Automobile, Pharmaceutical, and Manufacturing domains.
- **Engineered a connector-less SAP-to-BI data integration** collaborating with the ABAP team on data-refactoring techniques that refreshed the BI application daily directly from SAP without any direct SAP data-connector dependency, delivered within deadline.
- **Optimized a resource-intensive BI report** re-engineering a heavy transformation-layer report from a monthly run (which caused high resource utilization and BI server hangs) to a daily parallel run at minimal cost, earning multiple client appreciations.
- **Optimized ETL and reporting processes** reducing report run time from 36 hours to under 2 hours and cutting server load by 85%; implemented data quality controls that increased accuracy by 35% via cleansing and maker/checker governance.

IoT Developer (Intern)

Feb 2017 – Jun 2017

Autonetics Centre

Nashik, India

- **Built an assistive smart-stick solution** for visually impaired users using Raspberry Pi, sensors, and Android integration, improving mobility and obstacle detection by 30%.

DOMAIN & PROJECT HIGHLIGHTS

- **Insurance & International Analytics:** Lead analytics and BI delivery for the International module of a major US P&C insurer, supporting insurance KPIs, operational and management reporting, and international business performance monitoring.
- **Industries & Clients:** Insurance, Banking, Retail, Automobile, Pharmaceutical, Manufacturing, and FMCG — including Travelers (USA), DBS Bank (Singapore), Nissan, Bajaj Auto, Lupin, Abbott, Visteon, Charles & Keith, Keva, and Philips.

EDUCATION

Master of Technology, Data Science & Engineering

Apr 2021 – Apr 2023

Birla Institute of Technology and Science (BITS), Pilani

Bachelor of Engineering, Computer Science & Engineering

Jul 2013 – Jun 2017

Pune University, India

ADDITIONAL HIGHLIGHTS

- **Recognition & Contribution:** Awarded Star Performer and Volunteer of the Month; AI Mentor (CSR) supporting rural education; active contributor in innovation workshops and hackathons.
